GAO analyzed 3,244 advertised timber sales made in four western Forest Service regions in fiscal year (FY) 1981 and 1982 to determine: (1) whether individual sales were being made below cost and, if so the general magnitude of this practice in terms of the number, amount of loss, and geographic location; (2) the justification for it; and (3) whether better data could be given to Congress. GAO found that, overall, Forest Service revenues exceeded its costs by 712 million. However, although the timber was sold at or above appraised value, some of the sales did not generate enough revenues to cover the costs of making the sales. Below-cost sales had shortfalls of 64 million in 1981 and 92 million in 1982. Such sales occurred more frequently in Forest Service regions that had mostly low productivity timberlands, low sales values for predominant tree species, and relatively low volumes of timber sold. Generally, these sales were in areas that had steep terrain, which increased harvesting costs and involved engineering and construction costs. GAO found that, because the Forest Service does not identify...
