Direct democracy is largely associated with self-government of the people in ancient Greece. This Athenian democracy is something which, as population of states grew, was increasingly difficult to sustain. In, for example, Australia with a population of 19 million people direct self-rule which implies 'time-consuming and unwieldy procedures', with the likely effect of paralysing and not enhancing governmental decision-making processes, is largely unthinkable. Hence, today in the 21st century when one speaks of democracies what is largely meant is a representative democracy. Although remnants of direct democracy remain in aspects such as referendums, generally voters hand over their power in regular elections to representatives to rule on their behalf. The emergence of the internet has inspired many critics to believe that it can be the answer to overcoming what they see...
