MECHANICS OF NON-HOMOGENEOUS AND ANISOTROPIC FOUNDATIONS

Book Condition: New. Publisher/Verlag: Springer, Berlin | Although realistic soil and rock foundations reveal noticeable deviations in their properties from homogeneity and isotropy, the model of the homogeneous isotropic elastic half-space is widely used when studying static and dynamic interactions between a deformable foundation and structures. This is explained by significant mathematical difficulties inherent in problems concerning mechanics of anisotropic and heterogeneous elastic bodies. Solving the basic static and dynamic problems for heterogeneous and anisotropic half-spaces, such as different contact...

A top quality publication along with the typeface utilized was intriguing to read through. It is amongst the most awesome pdf I have got read through. It has been developed in a remarkably straightforward way and it is only right after I finished reading this publication in which it actually altered me, modified the way I believe.
